# ABOUT US

Founded on October 16, 2017, CGC Ltd has become a leading force in Nigeria's composite cylinder industry, proudly serving the nation with trusted solutions. We empower businesses and communities with reliable, high-quality composite cylinders, enabling sustainable and efficient gas usage.

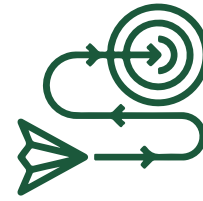

From supplying major gas companies to providing solutions for individual households, CGC Ltd offers a comprehensive range of composite cylinders for diverse needs. We've earned the trust of countless customers by delivering exceptional service, competitive prices, and unwavering commitment to quality.

## MISSION

To empower every Nigerian household and business with the power of clean and efficient energy, delivered with exceptional service and an unwavering commitment to innovation.

## VISION

To be the undisputed leader in Nigeria's energy landscape, driving economic growth and environmental responsibility through accessible, reliable, and sustainable energy solutions.

# OUR SERVICES

*CGC delivers safe, reliable, cost-effective gas storage solutions for every need, empowering businesses and homes across Nigeria. From fueling industries with LPG plants to ensuring home kitchen safety, CGC Ltd equips retailers, individuals, and corporations with the perfect composite cylinder solution.*

*With decades of experience, we become trusted partners, tailoring our services to meet the specific demands of each client, from gas station efficiency to home safety regulations.*

## EXCLUSIVE DISTRIBUTION

Experience the future of gas storage with Burham's lighter, stronger, and longer-lasting cylinders, exclusively available through CGC Ltd. Our strategic partnership ensures seamless access to industry-leading technology and unwavering commitment to quality, delivering you the best possible composite cylinder solutions.

As the sole distributor of Burham cylinders in Nigeria, CGC Ltd is your trusted partner for all your composite cylinder needs.

# OUR COMMITMENT

**Every step in our journey reflects our unwavering commitment to excellence, from sourcing premium materials to meticulous quality control.**

- Every CGC cylinder surpasses industry standards, prioritising your peace of mind.
- Experience reliable performance and extended lifespans with our best-in-class composite cylinders.
- Our efficient distribution network and passionate team ensure prompt delivery and ongoing support.
- Minimise downtime and fuel waste with our leak-proof technology and lightweight design.
- Embrace a greener future with eco-friendly, long-lasting composite cylinders.
- Our unparalleled commitment to quality ensures your safety and regulatory compliance.

**PARTNERING  
WITH CGC LTD  
ELEVATES YOUR  
GAS STORAGE EXPERIENCE.**

# VISION FOR THE FUTURE

As our growth journey continues, CGC Ltd aspires to emerge as the foremost market leader in distributing composite cylinders, enhancing safety and convenience for households, businesses, and industries throughout Nigeria. Our objective is to broaden our range of products and extend our presence geographically, thereby solidifying our reputation as a reliable and innovative partner in the energy sector.

# OUR PRODUCT

Our versatile cylinders are ideal for various applications, including boating, camping, picnicking, barbecues, and patio heaters. These LPG cylinders are suitable for diverse markets, serving as efficient fuel containers in agriculture, recreation, hospitality, heating, construction, sailing, fishing, and more. They can be used for cooking, central heating, water heating, cookers, and stoves and offer a cost-effective and efficient solution for off-grid home heating.

All Composite Fiber cylinders from CGC Ltd are certified by the Standard Organization of Nigeria (SON) to meet the highest quality and safety standards. We provide cylinders in various sizes for sale in Lagos and other states across Nigeria.

# THE BENEFITS

Explosion-Proof

Lightweight

Ease of Handling

Corrosion-Resistant

Translucent

UV-Resistant

Customisable and Attractive

# THE FEATURES

**Explosion-Proof:** CGC Cylinders guarantee 100% safety against explosions. Unlike traditional metal cylinders, their advanced composite material ensures they won't explode.

**Lightweight:** Our cylinders are designed for user-friendliness and weigh 50% less than conventional options, making them easy to handle.

**Ease of Handling:** CGC composite cylinders are exceptionally easy to manage due to their lightweight construction, with an empty weight of just 5kg.

**Corrosion-Resistant:** These composite cylinders are entirely corrosion-free, leaving no stains on your kitchen floor or any other surface. They remain corrosion-free even in humid or coastal environments.

**Translucent:** The cylinders are semi-transparent, allowing users to check the gas level quickly when exposed to light.

**UV-Resistant:** CGC Cylinders are resistant to UV rays, as well as the effects of sun, rain, and temperature fluctuations.

**Customisable and Attractive:** These cylinders can be customised to meet customer preferences and requirements. They are also environmentally friendly and resistant to shattering and tampering.

## APPLICATION / USES

CGC composite fibre gas cylinders offer a lightweight and durable solution for a variety of applications, including residential cooking, retail distribution, industrial usage, emergency power backup, and as an environmentally-friendly option for businesses committed to sustainability.
